PROFESSIONAL SUMMARY

Electronics and Telecommunication Engineering student focused on AI automation, LLM integration, API development, and practical AI engineering. Independently designed and built six AI automation projects using n8n, Ollama, REST APIs, PostgreSQL, Docker, and Google Workspace tools, covering email classification, API integration, invoice extraction, resume analysis, file conversion, and market analysis. Focused on building practical systems that connect language models, APIs, databases, and business workflows.

TECHNICAL SKILLS

AI & Language Models: Ollama, Qwen Models, LLM Integration, Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Output Validation

AI Automation & Workflow Engineering: n8n, Workflow Design, Multi-Step AI Workflows, Conditional Routing, Human-in-the-Loop Review, Error Handling

APIs & Integration: REST APIs, HTTP Requests, Webhooks, JSON, Postman, Data Transformation

Programming: Python, SQL, HTML, CSS, JavaScript (Fundamentals)

Databases & Data: PostgreSQL, Relational Data, Google Sheets, Structured Data Extraction, Data Validation

Developer Tools: Docker, Git, GitHub, Google Drive, Notion, Workflow Debugging, Local Development

PROJECTS

MailSentinel AI | AI-Powered Email Automation

github.com/Rohan-nnnnnn/MailSentinel-AI

Tech Stack: *n8n, Ollama, Qwen3:14b, PostgreSQL, Docker, Notion, RAG*

- Built an AI-powered email automation system that processes incoming emails, classifies them by category and urgency, and generates response drafts using an Ollama-hosted Qwen3:14b model.
- Implemented Notion-based policy retrieval using RAG to support context-aware response drafting.
- Designed human-in-the-loop approval workflows that identify cases requiring human review before action is taken.
- Stored classification results and action records in PostgreSQL to provide database logging of every processed email.

APIBridge: Smart API Integration Hub | API Integration & Automation

github.com/Rohan-nnnnnn/API-Bridge

Tech Stack: *n8n, REST APIs, JSON, PostgreSQL, Postman*

- Built an n8n workflow that receives requests, processes structured JSON data, and coordinates downstream API operations.
- Implemented data transformation and maintained success and error delivery logs in PostgreSQL.
- Tested success, duplicate-request, and error-handling scenarios using Postman.

InvoiceVault | AI Document Processing & Expense Automation

github.com/Rohan-nnnnnn/InvoiceVault

Tech Stack: *n8n, Ollama, Qwen2.5-VL:7b, Google Drive, Google Sheets*

- Built a workflow that extracts structured expense data from PNG, JPG, and JPEG invoice images using an Ollama vision model.
- Automated expense logging by recording extracted invoice information in Google Sheets.
- Organized files into processed and error folders in Google Drive, with error routing for failed items.

ResumeIQ | AI Resume Analysis & Generation

github.com/Rohan-nnnnnn/ResumeIQ

Tech Stack: *n8n, LLMs, Google Drive*

- Built a multi-stage AI workflow that processes resume information through analysis, correction, verification, and merging.
- Designed verification steps to detect unsupported claims and improve the reliability of generated resume content.

FormatWizard | Automated File Conversion

github.com/Rohan-nnnnnn/Formatwizard

Tech Stack: *n8n, File Processing, APIs, Google Drive*

- Built a form-based workflow that accepts uploaded files and user-selected target formats.
- Implemented conditional routing for supported format combinations and stored converted files in Google Drive.

Trading Assistant AI | AI-Assisted Market Analysis

github.com/Rohan-nnnnnn/TradingAssistantAI

Tech Stack: *n8n, AI Workflow, Market Data Processing*

- Built an automated workflow that processes market data and generates structured summaries covering trend analysis, momentum analysis, technical signals, and risk assessment.
- Implemented separate failure-handling paths for market-data retrieval and AI processing.

EDUCATION

B.E. Electronics and Telecommunication Engineering — **2024 – 2028**

Bharati Vidyapeeth College of Engineering, Navi Mumbai, Maharashtra, India
